day afternoon between Roaring Spring tism and the president s impending in But this article is to deal with nepo estigation The Congressional Direct tory discloses in part the prevalence of the graft of nepotism in the capitol For example, President pro tem Frys
of the senste had his nephew as private

of the committee of which he is chair man Sanator Burton's committee has U S Burton as messenger The re lationship is not close but the name is auggestive, as is also the case of John Mitchell Handy, who is on the pay of of the senate committee over which Sen ator Mitchell, of Oregon presides Senator Warren, of Wyoming, has his son and his name sake on the roll of his committee. The most remarkable case of 'senatorial courtesy' is that of

Senator J F Allee, of Delaware who appointed his son as his committee Traffic company, which operates the largest general and department store Johnstown were totaly destroy by fire Monday night The estimated loss is \$500 900 which is almost covered by insurance. r n among them to force railway legislation as is evidenced by the agitation, particularly in the west where the presion of Chiengo St Louis and Omermati as against New York is Many Offenders Will be Arraigned halping them materially. The r wav cry is 'Anything to stave off monkey

ing with the tariff which is the one sacred thing in their eyes. In order to help out this scheme they are now demanding that when congress assem bles there shall be all sorts of investi gations in every one of the departments in order to uncover graft that has existed and publish the grafter. Every well posted man knows there s demand enough for that in the natural course of events but their purpose is to create an artificial de mand such as they have for the regulation of railroad rates and "ways

rom their selfish standpoint They do not care whether the government regulates railread rates or investigates graft in the depart ment so long as it lets that beloved

tariff alone So, when congress assembles may expect a stirring up of a l of the sewage there is in these depart ment; down here and a renewal of the attempts in some way or other to force congress to a long winded and long drawn out consideration of the matter of railway rate control if these two can be drawn out long enough, and both look to me to be interminable there won't be time left for any tariff revision and you and I will keep 'shelling out for the benefit of the highly protected trusts who are willing to see everything go to the dogs so long as they keep their grip on the very good thing that they have had ever since the Dingley tar ff

It strikes me that the artificiality of this demand for railway rate reg more to every thinking man as the cussed Politicians would like to see addit onal powers given to the fater tionably, because it would be benefi something I wrote on this matter a week or two ago says that that commission would not necessarily be less the law which created it should be changed, because that law provides ernment printing office-a hot bed of in Section 1 that a majority of that graft-has three relatives appointed commission shall be of the dominant under him Congress can hardly be political party. There is no getting way from that and there is no ques tion whatever among politicians but

Dry Goods

There are many lines of staple and standard goods on which our prices are lower than any other house. Our lines are bought with a fine perception of our customers' needs—style and fabric tendencies are faithfully regarded—all that is timely and salable will be found in our general Dry Goods stocks, which have been considerably increased to correspond with the increased success.

Just the same kinds and qualities of merchandise as you will find elsewhere-prices frequently, very frequently, lower. That's the whole

Best Black Dress Goods

A prosperous dress goods business must be built up on a solid foundation—with good, honest Black Goods for the corner-stone. Our success proves we are building right. A woman judges a store by the way her dress wears. We've been here long enough now for that test to work to our advantage. Time and again our customers tell us ours are best in
